Maintenance Report

January 09, 2019

Submitted by: Lance McLaren

Report:

1. Water Testing:

Test results for Jan have been circulated via email to the board and published on the website.

2. Scarlett's Water Access Agreement:

Met with Don Scarlett shortly after our last board meeting to discuss our access to water at low water times due to the impact of his micro hydro access.

He showed me that he has at a couple of different locations with a 2 inch standpipe, similar to ours. He also showed me that this past summer he installed a new 2 inch pipe on the east side of the access road, south towards Rollins property.

He stated that since this new standpipe is near our intake, he would be agreeable to granting us permission to install a connection off this standpipe, that would then cross the road to continue to the side of our intake, where a 1 ½ inch line can connect to our intake.

This would give us the water we need at times of low flow, and would not adversely affect his supply as both his domestic water and power generating water come from the same pipe.

As we are currently working on a new access agreement with Scarlett's this new connection would be included in that agreement.

Board Action Required:

There is no additional action required from the Board
